WARD & MEETING.

WARD 8 MEETING.

The indignation meeting held at Crown Floin tast evening showed two thinge-disagreement and Jealousy among the Address of the delay in escuring whether the delay in securing such extensions, that the city was hargely to blans for the delay in securing such extensions in the east earl. The men and disgrapeful expension of the control of the delay in securing such extensions from the street Rallway Company assuredly cannot be blamed. Prom statements made by Aid. Morris it appears that the railway company is willing and ready to make extensions if the streets are put in shape by the city to carry a street railway. There are railway tracks and inlets to cross, and to carry the extensions along to James after the base line will have to be put in proper shape to receive the rails. The is proper shape to receive the rails. The eight cannot expect the company to build its streets for it. The daty of the eight period of the eight first to put the roads where extensions are asked for in proper condition and then present its ultimatum to the etinpany, if one be needed. It should also address itself vigorously to outting the other streets in proper repair and make them fit for "traffic. We have been also address itself vigorously to nating the other streets in proper require and the work to a great extent, and we are not prepared to join in condemnation of the Board of Works. It cannot do impossibilities, and we know that Ald. Mitne, the chairman, is a hard-working, conseidention alderman, who does not conscientious alderman, who does not neglect any opportunity to further the work.

The fact of the matter appears to be that the city has outgrown the City. Hall: the work has apparently got be-yout the shifty of the alaterne to cope with it. The city has grown so fast in that direction that they have been umble to keep up with the needed in provements. Too many surveys have been taken in and too many streets have been spend up, with the result have the authorities cannot overtake the needed work.

PEACE IN SIGHT.

PEACE IN SIGHT.

The Balkan allies, we think, have acted wisely in agreeing to discuse peace terms with the Turks without waiting to reduce Constantingple, whose capture would, no doubt, mean the sacrifice of many lives as well as much suffering by the inhabitants. The allies have been ovictorious that they can afford to forego Constantinople, and ford to forego Constantinople, and ford to forego Constantinople, and better to the vanquished free, They may know, however, that were they able or allowed to retain the Turksh capital it might turn out to be a white elephant on their hands. And then it is doubtful if they would be allowed to remain in possession of it, both Austria and Russia desiring it. Left in The hands of the Turks, the powers would be less anxious to interfere. Europe will be safisified to see Turky driven off that continent. Let us hope that the terms of peace will be such as to make peake speedy and lasting.
